DURABILITY	●●●	●●●●	●●●	●●●●●	●●●	●●●●
SHARED FEATURES	Fair Trade Certified™ sewn, recycled face fabric, H2No®, DWR (durable water repellent) finish, alpine helmet-compatible hood					
FIT INTENT	Alpine shells are fit for performance with arm articulation and compatibility with a harness					

Responsible Waterproof Shells

First in the industry to make all 62 of our shells with recycled materials and sew them all in Fair Trade Certified™ factories. That's what we're celebrating this season. Our focus is on the achievement and the risks and rewards of going first. Using recycled materials allows us to reduce our dependence on petroleum-based products. We source our materials from industrial waste, as well as plastic bottles, fish nets and other sources of consumer cast-offs. All of this creates a smaller environmental footprint. Fair Trade means we make payments directly to the workers who build these jackets. All of this culminates in a line of waterproof shells that we can confidently call, "responsible." Now we want the whole industry to follow.

H2No® Performance Standard

H2No® Performance Standard is Patagonia's benchmark for waterproofness, breathability and durability. Backed by our Ironclad Guarantee, our H2No Performance Standard ensures the highest level of long-term waterproof performance. The rigorous lab and field testing of H2No is unparalleled in the industry.

FIT INTENT	Snow shells are fit in the ski/ride position, with room to move, and have a slightly longer back length than Alpine shells						

Responsible Waterproof Shells

First in the industry to make all 62 of our shells with recycled materials and sew them all in Fair Trade Certified™ factories. That's what we're celebrating this season. Our focus is on the achievement and the risks and rewards of going first. Using recycled materials allows us to reduce our dependence on petroleum-based products. We source our materials from industrial waste, as well as plastic bottles, fish nets and other sources of consumer cast-offs. All of this creates a smaller environmental footprint. Fair Trade means we make payments directly to the workers who build these jackets. All of this culminates in a line of waterproof shells that we can confidently call, "responsible." Now we want the whole industry to follow.

RECCO® Reflector

Each product has a concealed RECCO® reflector that makes you searchable to professional rescuers by bouncing back a directional signal used by ski resorts and rescue teams, which directs rescuers straight to the reflector. RECCO reflectors do not prevent avalanches, nor do they guarantee location or survival of a buried or lost person. Reflectors are also not a substitute for an avalanche rescue beacon. RECCO is a registered trademark of Recco Invest AB.

H2No® Performance Standard
